

An Announcement from the IOMICA Secretary on behalf of the IOMICA Executive.

Please be aware that the Annual General Meeting of the World Council of The International One Meter International Class Association will take place between Monday 18th September 2006 00:00 GMT and Monday 25th September 2006 00:00 GMT.

The meeting will be held electronically. Each resolution will be posted to the WC Resolutions forum. Unfortunately the polling system provided via the forum isn't sufficient for our needs, we will therefore require votes to be submitted via email in a specific format to the IOMICA Secretary during the period of the meeting. These results will be compiled & posted to the forum. Instructions on the information required and the correct format, along with a template will appear shortly.

You will find a copy of the agenda available for download from the IOMICA web site.

There have been three proposals for a class rule change to incorporate a topping lift restraint attached to the headsail boom. In an effort to prevent problems with conflicting rule changes only one of these proposals has been adopted by the IOMICA Technical Sub Committee and included on the agenda.

Please also take this announcement as a reminder that each NCA / NCS must provide details of voting strength as per IOMICA regulation 4.9 by 21st August 2006 00:00 GMT. Also, for resolutions requiring owner ballot, a list of owner votes must be provided prior to the vote being cast.

Andy Stevenson
GBR 1779
IOMICA Secretary
