

CRO NCA submission for the IOM ICA AGM 2025

Greetings,

We are re-sending exactly the same proposal that was already voted on by majority of 76.66% the year before, but as we did not have the procedure for IRSA approval of the IOM Class Rules as in the latest IRSA – IOM ICA Memorandum of Understanding, this was not validated through the very end in IOMICA. Thus, we are just re-confirming this once again as it was already voted on with “YES” before by biggest majority, hope everything is just a procedural matter at this point.

Here is re-submitted proposal shortly, exactly the same wording that was already accepted last year:

Add following to the IOM Class Rules:

F.2.4 (e) Kicking strap shall be capable of passing through a 20 mm ring gauge.

Reasoning: We want to limit kicking strap size so that all the existing IOM fleet will remain legal by this rule change (to the best of our knowledge) since the same resolution was already voted on and accepted on AGM last year and many sailors worldwide already use this kicking strap.
